

## **Watcher Token**

**Abstract:** This is a project that brings together people who wish to gain rating to their contents and people who wish to earn money in exchange for their given rating.

### **1. Introduction**

In today's world, content creating has become one of the major professions. Content creators, earn money by interactive relations. In this enormous ocean called Internet, those who are outside the box of important creators have a hard time to make their voice heard. The listing algorithms of social media platforms are based on highlighting the big whales who get a lot of views. On the discover pages of social media platforms are the most viewed accounts only. On the other hand, content creators give a lot of their hard work and devotion to be discovered and therefore, they face the fact that they have to pay huge budgets for advertisements. Watcher token is the help that content creators need on this very topic.

### **2. The principle of the system**

Our system serves a different way of earning money for every different purpose. Let's go over this in three steps.

#### **a. From the viewpoint of content creators;**

Content creators wish for a content to gain rating and this has to be organic. They want a video they share to be watched by thousands of different computers. Watcher Token gives them exactly what they want. The viewers we call the miners, earn money to watch videos in the system. A video added this way can get thousands of views in just a second. The producer who wants their video to gain rating, determines a price on Watcher Token, and every viewer provides viewership by earning this price. The content creator can earn Watcher Token themselves by mining at the same time, and they can gather the tokens they will spend for viewership, for free.

#### **b. From the viewpoint of miners;**

The viewers we call the miners, can earn tokens by just watching videos on a simple computer. The miner application watches the video that pays the most tokens, automatically. This way, they can gain the video's payment and the mining payment that system determines.

#### **c. From the viewpoint of referrers that bring the two sides together;**

By sharing the invitation code that they got from the system, they get 10% of all the income. When a referrer brings a member in, the referrer gains 10% of all the in-app purchases, video views and mining rewards of that member. As a result, the referrer can make their content viewed or convert their tokens into money.

### **3. The entries that highlight Watcher Token.**

#### **a. Mining**

Mining is a operation that requires a huge processor power in today's world. It needs very powerful CPUs and GPUs. To provide these devices are expensive and yet hard. At the same time, the waste of energy is a very unproductive operation.

Watcher token mining doesn't require a powerful equipment. Anybody who has an average computer can be a miner. The only important thing for a miner is to watch videos and prove that they are watching. It can be activated on times that the computer is not needed for anything, or it can be activated on a non-actively-used computer. The computer, with the application, will just visit websites and will make miners earn money in relation to this.

#### **b. Content interaction**

Watcher token helps the content creators to reach the discover page without having to advertise. If the content creator also mines, they don't have to buy tokens additionally; because they will spend the earnings on views. By this, they can increase the amount of interaction free of charge.

### **Technical info on the Token**

Watcher Token was created on binance smart chain.

Contract code: 0xddB88941E9a963BFE3545A479Db1b6af5031bCeD

The amount produced: 52.000.000

Symbol: WTCN

### **Financial info on the Token**

Total demand: 52.000.000

Daily mining rewards: 10.000 and 10% less than the previous year.
